GRADUATE CONSULTANT (DATA ENGINEERING)

Dedicated and hard working data engineering consultant with a strong foundation in software development and data analytics. Proficient in multiple programming languages, such as Java, Python, C#, TypeScript, and many more with a demonstrated ability to tackle complex problems in the technology space. Exceptional problem-solving skills, demonstrated through projects involving machine learning, web development, and databases. Proven ability to learn quickly, work in teams, and handle multiple tasks simultaneously.

SKILLS

Data engineering	Data analytics	Strong interpersonal skills
API development	Report writing and presenting	Excellent communication
Version Control	Time Management	Devops and Cloud computing

PROFESSIONAL EXPERIENCE

Moyo Digital Business Consultancy   **Feb 2024 - Present**
Graduate Consultant (Data Engineering)
Worked with clients to design, implement, and optimize solutions to meet their business's needs. Leveraged technical skills as well as training provided by Moyo, to best provide value to the client. Demonstrated flexibility and adaptability by playing multiple roles within teams as required, including that of a business analyst, software developer, and business intelligence analyst. Built meaningful connections with colleagues, proving strong interpersonal skills.

PROFESSIONAL PROJECTS

Asset Management Systen
Maputo Port Development Company
Integrated into a large team of developers to immediately begin delivering value to the client, working as a full-stack software developer. Wrote code following SOLID principles to ensure maintainability, scalability, and efficiency. Engineered offline capabilities to address low-connectivity challenges in port environments. Demonstrated adaptability, technical versatility, and problem-solving skills in a fast-paced project setting, contributing to all aspects of development from backend services, to responsive frontend web and mobile interfaces.

Procurement & Consumable Inventory Management System
Capstone university project
Collaborated with four other students to develop a procurement & consumable inventory management system. Interfaced with stakeholders to understand the problem faced, obtain business requirements, and ensure satisfaction. Wrote well principled, efficient code for the system in order to meet project objectives as well as extensive documentation to ensure a seamless handover to the client. Handled the optimization of the database which yielded notable improvements in database performance.

EDUCATION & CERTIFICATIONS
